

## SafeStore 2000C

Safe deposit lockers for storage of valuables

SafeStore 2000C is a safe deposit locker range utilising the vault space with attractively designed lockers and cost-effective visiting routines. SafeStore 2000C is fast and easy to install in a range of vault types: concrete strong rooms, pre-fabricated strong rooms, safes or free-standing in hotel lobbies. Three models are available with several choices of

locker height. Each model offers different combinations of lockers, either painted or with a stainless steel finish. Access can be granted via a manual locking system or electronically, using the innovative locker management software solution, SafeControl.

Safe deposit lockers for storage of valuables

## Features

SafeStore 2000C is a safe deposit locker range utilising the vault space with attractively designed lockers and cost effective visiting routines. To suit different customer demands, the SafeStore 2000C is available in three models with column heights at 1720mm, 2020mm and 2220mm. For other requirements, SafeStore 2000C can be delivered in specified heights. Various locker heights are also available from 50mm up to 600mm. Additionally double width columns are available for large lockers.

The standard cassette is made of soft fibre material with gold anodised edging for efficient utilisation of the locker's volume. The cassette is standard for all locker heights up to 300mm. As an option the cassettes can be delivered in steel or plastic. Extra protection for storing of data media can also be provided.

## Security

The SafeStore 2000C locker door has a unique security design to protect against a range of physical attacks. The units are approved in accordance with stringent security standards, as laid down by the Swedish Banks' Security Committee.

## Locking

SafeStore 2000C lockers can be accessed via an electronic lock through the innovative locker management software solution, SafeControl or via a manual locking system. As standard, the lockers come with a manual and electronic lock and come ready to be equipped with the SafeControl.

- The client lock is classified EN1303 and offered in 2 versions -chrome (31C43) and brass (31B43) and can either be delivered from the factory or simply installed from a sealed container when the locker is hired, to avoid illegal copies of the client's key.
- The state-of-the-art electronic lock for each locker is connected to the SafeControl which immediately sounds an alarm when an attempt is made to manipulate or physically attack the locker. In addition, all events are recorded in an audit trail.

## Design

The SafeStore 2000C range is attractively designed, available painted. This allows the lockers to be integrated with the bank's interior design to ensure continuity even inside the vault. The flexible layout options in the SafeStore 2000C allows the expensive vault area to be well utilised as well as ensuring an attractive environment.

## Quality and environmental management systems

SafeStore 2000C safe deposit lockers are all manufactured in accordance with the ISO 9001 quality management system and the ISO 14001 environmental management system.

## Quality control

The SafeStore 2000C range has been developed and continuously tested according to the existing European norms with the aim of guaranteeing quality and assuring customers that the products live up to the highest expectations.

### Colour examples

SafeStore 2000C is available in any RAL colour of your choice.
