## Safe Deposit Lockers Solution

Banks demand solutions for their clients which are both secure and convenient to use. That is why Gunnebo has created the 60F range of safe deposit lockers, beautifully designed to provide a welcoming and attractive environment for the users.

60F safe deposit lockers are installed in columns with a range of three different heights (1800, 1950 & 2100 mm). Single-width columns (300mm) or double width columns (600mm) for extra large lockers are both available in an attractive stainless steel housing.

## Product Overview

The 60F lockers have been specially designed with strong polyethylene cassettes to be easily carried by the renters. Seven different locker heights are available as standard 75, 100, 150, 200, 300, 450 and 600 mm.

The minimum locker width of 300 mm ensures that documents can be stored without folding. The lockers also have concealed hinges for an aesthetically pleasing design.

60F deposit lockers are quick and easy to install, be it inside a prefabricated vault or a vault or as a free-standing unit. In addition, the broad range of 60F models and installation options means that available space is used in the most effective way possible.

The “columns” concept for the installation ensure a very solid group assembly.

## Technical Specifications

Dimensions in mm	Columns Size 1	Columns Size 2	Columns Size 3
Sum of locker heights	1800	1950	2100
